VACANT SPACE

- At the end of 2012, the vacancy rate in Kraków stood at 4.6%, which represented a 3.9 percentage point drop in comparison with the same period in 2011.
- The lowest vacancy rate was recorded in the north-east zone (1.2%), whereas the highest was in the central part of the city (7.6%).

PROGNOSIS

- In H1 2013, the office supply in Kraków will remain virtually unchanged as only one scheme of 1,800 m² is going to be completed.
- The largest office projects planned for 2013, such as Quattro Business Park C (12,200 m²) and Bonarka 4 Business D (8,700 m²), will be delivered in the second half of the year.
- Leasing activity in the first six months of 2013 may exceed 60,000 m².
- The considerable amount of space under construction (78,000 m²) combined with the limited availability of premises in existing buildings may translate into a growth in the share of pre-let deals in total transaction volumes.
- The vacancy rate in H1 2013 is expected to record a further decrease, which might result in upward pressure on rental rates.
